1. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

2. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1-4 recite the limitation "the weighting" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 7 and 8 recite the limitation "the weighting" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claims 5 and 6 are rejected for depending from aforementioned claim 4.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by US6829568. The US6829568 reference discloses the utilization of a multiple model tracking filter which controls the weighting applied to outputs of multiple model functions; feedback signals to respective inputs of the multiple model functions; and the feedback loop provides a feedback signal based on a convex sum of a weighted estimate produced by the multiple model tracking filter.

With regards to claim 5 the reference discloses and the utilization as a radar tracking filter.

With regards to claim 6 the reference discloses the utilization of constant acceleration and velocity model functions.
